

# The Apple Tree

It's Spring it's a good time to plant an apple tree. It will take years and years and years but it's worth waiting for. You can harvest it in fall. The apples taste yummy and fresh. You can hang a - lbs. swing off of the apple tree. You can make lots of treats from the apples. You can make a crown from the leaves. Some of the apples can be hard to pull off. You can pick apples from many different places in Maine. I love apple trees!
