

# Trees

Birds, squirrels and owls make their homes in trees. Trees are all around us. Trees are important so we can breathe. They make oxygen. In summer you can use them for shade. Trees can also help us dry in the rain. My favorite trees are the Oak and Maple trees because they are the biggest trees I've ever seen. You can make stuff out of trees like houses, tables and paper. You can climb trees for fun. I like trees because they are special! 😊
