

Nature Wonderland

There is a mountain
That reaches the clouds
A mountain that surrounds you
With a soft breeze cradling your face
Giving your nose a cold nip
In this place the trees entwine
While you hear birds singing all day long
The owls hooting through the night
A gentle reminder you are never alone
As butterflies flutter around
A creation of art is made
Painting the world with their beautiful color
It's hard not to jump in the leaves
Splash in the water
Climb the trees
Or lay in the sun
This is a place
You never want to leave
This is paradise
This is serenity
This is Nature Wonderland
