School Committee Report

September 2020

Facilities & Transportation

The summer has been extremely busy ordering PPE items required for the opening of schools. We have a large stockpile on hand but continue to order more for future use.

Equipment for cleaning and sanitizing all areas in each building has been purchased. The custodial staff is equipped and ready to do multiple cleanings during the school day and complete sanitizing every night.

Transportation plans with Ledgemere are in place. Guidelines provided by the Maine CDC and Maine Department of Education will be followed.

Physical adjustments including classrooms, hallways, bathrooms, offices, etc. have been made at each school to comply with Social Distancing requirements and are ready for school to begin on September 8th.
