School Committee Report
January 2021

Chromebook Distribution-Beyond the typical troubleshooting and assisting students and staff, the month of December was spent processing Chromebooks for distribution. Before Thanksgiving we received 300 Chromebooks from one vendor and another 29 from another in Early December. From there we have been unboxing, enrolling and preparing for distribution. Most of these devices will be heading to WHS to make sure all students who need access to a device will have one in the building or remotely.

Computer Science Week 2020-The month of December includes a week dedicated to Computer Sciences and this year Computer Science week was December 7-13. Students at the Elementary School experience many levels of coding through the work that Marty Cryer creates for students. Jason Hludik has students working on different STEM related projects like using TinkerCAD and 3D programming throughout the year. As a district we strive for students to have all kinds of experiences when it comes to computer sciences and don't limit the opportunities to one dedicated week.

Q2 for Data-In the next week or so, the district will be certifying their Q2 reports for behavior, truancy, bullying, and attendance.
