

ACCELERATION

The Wells-Ogunquit C.S.D. School Committee strongly urges the staff to see that students are assisted in moving ahead as rapidly as they need and are capable. While provisions for individual differences should be adequately accomplished within a subject or grade level, it may occasionally be necessary to advance a student to the next subject or grade level. A recommendation for a capable student to be advanced will be made by a team which is to include the student's current subject or grade level team, guidance counselor, the parent(s)/guardian(s), the Director of Special Services, a gifted/talented staff member, and current building principal. The recommendation for advancement (acceleration) shall be made to the Superintendent of Schools for the Superintendent's approval and the Superintendent of School's decision shall be final.
